A: This issue has been resolved in April 29th 2013. Q: Dynamic data for NSButton I'm beginner for Mac Programming and I am trying to get dynamic data for an NSTextField in an NSButton. I searched on stackoverflow and I found the way to do so in an NSLabel, and it worked well. But it doesn't work when I try it with NSTextField. the error message is "Expected ; instead of }" is there a way to do this? the code is -

```
(void)MyButton:(NSButton *)sender { NSLog(@"%@", [sender.titleLabel text]); } A: -
(void)MyButton:(NSButton *)sender { NSString *title = [sender.titleLabel.text
 stringByTrimmingCharactersInSet:[NSCharacterSet whitespaceAndNewlineCharacterSet]]; if (title && [title
 length] > 0) { NSLog(@"%@", title); } else { NSLog(@"Empty title. New title."); } } // =
