

Metal Gear Solid Hd Collection 1.03 Patch Download WORK

[CLICK HERE](#)

To clarify, both the PS3 and Vita versions of MGS3's HD Collection edition include all the HD additions and Konami additionally confirmed this via the PS blog. The PS Vita version does not include Peace Walker or download codes in any of its in-game functionality, this is also the reason that the PS3 version has "HD Patch 1.03" (complete with a pre-patch entry) on PSN, while the PS Vita version has not. MGS1 on PS3 is part of the MGS Collection, a PlayStation Store sub-category that also includes MGS2 and MGS3. Each title in the MGS Collection requires a separate download of 150-200mb depending on the version, if you check the store page for the MGS Collection, that is actually the required download for the MGS Collection itself, followed by the required patches (all version-dependent). I just got Metal Gear Solid HD Collection 1.03 for free on PSN and I'm having trouble uninstalling it. How can I uninstall it? Depending on how Metal Gear Solid HD Collection 1.03 was downloaded to your PS3, you can use the following steps to uninstall/uninstall a single game app or patch.

- 1) Connect PS3 to the internet via Wi-Fi, and launch Store (the main menu).
- 2) Press the Left and Right Analog Sticks to select from Game and Apps categories respectively.
- 3) Tap on [See Game Installed] and select the app or patch. Press the

following buttons to cancel [See Game Installed] and select or cancel the last option. (2) If the Last option is selected, then that would be [See Game Installed] option which you are viewing as the Home screen as you are done here with that. (3) Swipe up (or down if you are using Android) on Home screen to clear. If [See Game Installed] option is selected, then that would be the option that you are currently on. Press the following buttons to cancel [See Game Installed] option, then tap on Home Screen to return to home screen. (4) If the app or patch is installed, a message would appear on top of the Home Screen. (5) If [Select] button is selected on screen (5), then that would be [See Game Installed]
